[LinkedIn](#) · [Github](#) · [Portfolio](#)

An Information Technology graduate from Kisii university with a passion for building sustainable technologies, leveraging skills in python and machine learning.

## EXPERIENCE

**School Project: Cancer Detection System**                                    **Oct 2024 - Mar 2025**
*Kisii University, Kisii, Kenya*

- Built an intelligent system to detect cancer from X-ray data.
- Improved early cancer detection by unlocking clearer insights from X-ray images.
- Incorporated AI ethical principles into the system.

**School Project: Addiction Solver**                                    **Jan 2024 - Mar 2024**
*Kisii University, Kisii, Kenya*

- Developed an AI powered chatbot that provided quick guidance and support to individuals in addiction.
- Deployed the web application as a one tier service on render.com.
- Performed Beta testing of the application.
